SIMPLE AND RELIABLE OPERATION

VODACZ

Containing no electronics (except for the blower), the WWTP features minimum presence of failures.

As a comprehensive range of WWTP, the technology is identical in all of them. Therefore, you will have no problems to deal with even if you are responsible for several WWTPs of the range.

The wastewater treatment plants are produced in standard height. However, if necessary, we can provide for a higher plant or add an extension to standard height.

WWTP 20 to WWTP 50 are produced as one vessel. Larger WWTPs (65, 75, 85, 100) are produced as two communicating vessels.
